DIRECTIONS for converting your birthday into MAYAN ASTROLOGY

Step 1... Find the number corresponding to your year of birth.

Step 2... Find the number for your month of Birth.

Step 3... Add these two numbers you found above and add the DAY of the month your were born. Add all three numbers together. *Example... December 14th 1975 = 127 + 74 + 14 = 215 TOTAL*

Step 4... The Mayan Calendar is 260 days long, so if your total number is over 260... simply subtract 260 from your count. Each of the MAYA ASTROLOGY DAYS are numbered from 1 to 260. So it is simple just find the number you added up and find this number in the first column on the following four Charts. You have now discovered your Mayan Number and Glyph, and direction, and if you were born in a galactic portal....

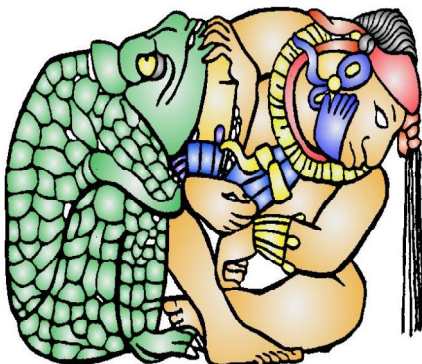

You will also discover which are your guiding days, your supporting days, your activating days and days for surprises... HAVE FUN and if you want to know more, our book MAYAN ASTROLOGY will share a lot more, sold in our book store at www.AlunaJoy.com
